TVET EGYPT WEBSITE FEEDBACK

1. ~~The navigation bar is still too big - and there's still a lot of space between it and the edges of the page on either side.~~ *(Width became 90% instead of 80%)*

2. ~~The font of "Contact us" in the navigation bar looks uneven.~~ **What do you mean uneven?** *(Most probably it's the font itself)*

3. ~~The home page banner is still too big.~~ *(became 72vh instead of 82vh)*

4. ~~The image banners inside the website are also still too big and should (according to the design) be proportionately smaller (in height) than the home page design.~~ *(became 65vh instead of 72vh)*

5. ~~Let's please ensure consistency in font sizes/uses of bold. some parts of the text look bigger than others.~~ **Please specify which parts/pages?** *(Most probably it's the font itself)*

6. ~~Can we please reduce the height of the gold disclaimer on the bottom of the website?~~ *(height became 143px instead of 159px)*

7. ~~Can we please reduce the height of the blue around the infographic section on the homepage and on the "About the programme" page.~~ *(became 469px instead of 520px)*

8. The color of the "Market impact" Infographic is a bit too pale. **What's pale? the icons or background?** *(Most probably they want solid background-color)*

9. ~~Can we amend the animation of infographics to be more dynamic? (ex: in the "About TVET Egypt", if we're clicking on an arrow to the right, then the numbers should slide to the right, not appear and disappear).~~ *(Done slide left instead of fading in and out)*

10. ~~In the "About TVET Egypt" infographic, where are the rest of the numbers and icons from the content?~~ **we were missing the rest of the numbers summarized in 3-4 words. It could be updated through the backend.** *(CPT has been added TVETEgypt impacts)*

11. Across the website, the content is not fully correct – there are parts of the text different than the approved content document. **(Can they please specify which parts in order to change it without the need to check the whole content)**

12. ~~Also, across the website "TVET Egypt" is what should be bold, since it's the name of the program - not 'TVET' on its own. This was reflected in the content document. Please change this across.~~ **what if TVET was mentioned on its own?** *(TVET Egypt only became bold instead of TVET)*

13. ~~For Sectors of Focus - is it possible to make sure that development wise (in the future), PIU will have the option to make each sector clickable and this can open a new page.~~ *(Added permalink to each sector of focus)*

14. Can we make the text on the banners on inside pages editable? **everything is editable if you have adequate technical skills. (Ask Muhannad)**

15. ~~Impact Egypt numbers to be dynamic from Admin Panel~~ *(CPT has been added TVETEgypt impacts)*

Mobile version comments:

- ~~Under implementing partners, can we put arrows on either side of the logos to show that more will be appearing?~~ *(Arrows added)*

- ~~Under "grants", the placement of the logos of each grant looks awkward. Can we enhance this a bit, please?~~ *(Content is centered on mobile)*

- The TVET Egypt impact looks too huge/spread out.
-
- ~~Under "purpose, mission, vision, values" – can we highlight more when one of them is "selected".~~ *(background-color and color changed back and forth)*

- In the drop-down menu, the items under "Technical education and vocational training" are not bold, while the items under "areas of intervention" are bold. Please make the latter not bold and make the main navigation bar items bold (Technical education and vocational training, areas of intervention, Get Involved, Media Center, FAQs, Contact Us.

- ~~In the navigation bar, please capitalize "us" in contact us.~~ *(Done)*

- Also, in the drop-down menu, can we visually distinguish between. **Missing the rest of the comment?**

- All relevant comments above apply.
